**Work Ethic**

# ABOUT

Hi, I'm a passionate front-end developer with hands-on experience in HTML, CSS, and JavaScript. I specialize in building responsive, user-friendly websites that are both functional and visually appealing. As an entry-level developer, I'm constantly learning and growing, always eager to take on new challenges and improve my skills.

In addition to coding, I have experience using Figma to design wire frames and UI layouts, helping me bridge the gap between design and development. My goal is to create web experiences that are intuitive, fast, and accessible to all users.

JOHANNES
